  2017-2020

Projects

NewLook Fashion website

- *Website Development specializes in selling fashion items such as handbags, hats, sunglasses, backpacks, and some other things*

- *Use HTML/CSS and enhance user experience with JavaScript functions.*

- *Use Node.js to handle backend functions like user authentication, product management, and order processing.*

- *Employed MongoDB as the database management system to store product information, user profiles, and order details securely.*

- *Implemented version control with Git to manage project collaboration and code deployment efficiently.*
